TECHNICAL PROJECTS

FollowDoc: GitHub | Live App (Surge) | Demo

- Developed and designed React web application to help users keep track of medical issues and doctor appointments.
- Built complex Rails API backend with PostgreSQL using JSON Web Token (JWT) and Bcrypt to establish relationships between users, appointments, and doctors.
- Utilized Active Storage and AWS to store user files and Google Maps API to display appointment locations.
- Created and designed user interface using React and Redux for state management, and CSS for styling.

Appointments List: GitHub | Live | Demo

- Created a Multi-Language web application based on React Hooks and React Context.
- Formed a search engine that allows users to narrow down their list based on name, doctor, and other information.
- Designed and implement powerful user interfaces and elegant responsive design with CSS and SASS.

QPQ: GitHub | Live App (Heroku) | Demo

- Collaborated with three engineers to build React web application allowing users to trade services.
- Developed Rails API and PostgreSQL backend with endpoints for users and services complex workflows.
- Architected and Implemented rich components with CSS to display services information.

What Should We Do: GitHub | Live App (Surge) | Demo

- Created an activity journal to helps users log everywhere they visit and add reviews for those places.
- Developed a single page application (SPA) with HTML and vanilla JavaScript.
- Optimized end-user experience using CSS to ensure responsiveness of the application.
- Generated Rails API backend to track activities and users.

Favfest: GitHub | Live App (Heroku) | Demo

- Built Rails Application provides users with information about music festivals, allowing an interactive diary.
- Utilized MVC structure and RESTful conventions, HTML Forms, Active Record Models, and Relationship using Postgres Database. Added custom validations to increase security.
- Embedded seeded YouTube links that rendered fully interactive videos on generated pages.

EDUCATION

Flatiron School | Full Stack Web Development, Ruby on Rails, and JavaScript Certificate Program | Seattle, WA | 2020
Bachelor of Arts (B.A.) | Media Studies & Management | School of Media Studies | College of Management | Israel

PROFESSIONAL EXPERIENCE

Full-stack Software Developer **01/2021 to present**
Anchor Technologies, Inc. **Remote**
Developing a series of integrated web apps allowing for an entirely new product to be launched. Collaborating with the product owner and other engineers to translate requirements into technical design, review application functionality, and define project requirements and execution plans. Work with Typescript, JavaScript, React, *Express, Webpack, GraphQL, Apollo server.*

- Responsible to develop and implement the product end-to-end features. Build reusable front-end components to improve readability and maintainability by abstracting code and simplifying methods. Utilizing React framework with styled-components and Material-UI.
- Engineered Node.js server/backend systems to support data-intensive systems. Architected schemas to create complex relationships between models and manipulate data to optimize requests.
- Build and design innovative admin web app to manage customers and customer's databases including upload, parse and persist sensitive data and sending requests to other servers.

Operations Manager | Project Manager **2011 to 2018**
ZAPPA Group **Israel and Remote**
The Zappa Group owns music clubs located in major cities in Israel, a production company that is responsible for local and international festivals and music events, and a ticket office that sells more than one million tickets a year for a variety of performances. Promoted into Project Manager role based on relationship management skills.

- **Operations Strategy:** Designed, planned, executed, and managed a large-scale project of an online box-office/ticketing platform website. Implement processes to ease remote working using cloud technologies. Designed and maintained company data sets. Subsidiary eventually became one of Israel's biggest ticketing companies.
- **Project Management:** Planned and managed more than 30 project schedules, timelines, and budgets of $100k - $1M annually. Resulted in 30% growth in new projects each year.
- **Training:** Supported Representatives in troubleshooting complicated calls as well as technical support and software issues. Improved overall retention and reduced hiring costs. Managed 15 employees directly and oversaw over 100.

Ticketing Call Center Shift Lead **2009 to 2011**
ZAPPA Group **Tel Aviv, Israel**
Shifted career focus to build direct customer service leadership experience, marketing, and event management experience.

- **Customer Relationship Management:** Managed and operated the VIP membership club (e.g. communications, billing, tracking membership renewal, event coordination, and data analysis). Increased new memberships by 10% monthly and improved membership retention by 5% yearly.

Advertising Account Executive **2008 to 2009**
Ankona Advertising **Tel Aviv, Israel**

- **Coordination | Advertising | Collaboration:** Coordinated high-profile corporate agency clients (such as Microsoft Israel and Office Depot Israel) Creatives and Account Executives to create marketing and advertising campaigns with budgets of $20 - $50K. Integral part of team that developed advertising for retails stores.
