## SUMMARY

Full stack software engineer with 4+ years creating scalable, production-grade web applications and web services end-to-end. Collaborates closely with product and design to ship dependable, high-impact frontend and backend development across TypeScript, React/Next.js, Node.js, GraphQL/REST, and PostgreSQL.

## SKILLS

**Languages:** TypeScript, JavaScript, Ruby, Python, SQL

**Frontend:** React, Next.js, Apollo Client, Tailwind CSS, HTML/CSS, responsive UI design, design systems

**Backend & APIs:** Node.js, Express, Ruby on Rails, REST APIs, GraphQL, Apollo Server, JWT authentication, RBAC, service-oriented architecture

**Data & Storage:** PostgreSQL, MySQL, Prisma, schema design, migrations, indexing, performance tuning

**DevOps & Testing:** Docker, CI/CD, Git/GitHub, Jest, React Testing Library, integration testing

## EXPERIENCE

### Full Stack Software Engineer, Anchor Technologies, Inc. | Remote | Jan 2021 – Oct 2025

*Core contributor on a multitenant B2B cybersecurity SaaS, owning design and delivery of full stack services.*

- Launched 15+ production features across TypeScript, React/Next.js, Node.js/Express, and Prisma/PostgreSQL, guiding initiatives from discovery through rollout.
- Translated complex business rules into scalable technical requirements, enabling 90% on-time sprint completion.
- Established robust multitenant database schemas to accelerate development and minimize rework.
- Implemented secure GraphQL/REST APIs with JWT auth and RBAC for controlled access to customer data.
- Introduced a shared React component layer and backend utilities, raising engineering throughput by 25%.
- Enhanced PostgreSQL performance via improved indexing and refined Prisma queries, cutting API payloads by 40% and reducing load latency.

## PROJECTS

### Freelance Full Stack Engineer (Side Projects)

*Created and maintained full stack applications and data processing pipelines for independent clients.*

- Optimized Rails/MySQL schemas with targeted migrations that increased data consistency and efficiency.
- Developed a Node.js/TypeScript service with token-based access for JSON/CSV report generation and automated email delivery.
- Released a responsive React/Tailwind interface with refined UX and consistent cross-browser behavior.

## EARLIER EXPERIENCE

### Operations Manager & Project Manager, Zappa Group | Tel Aviv, Israel & Remote | Oct 2011 – Apr 2018

*Oversaw cross-functional execution of an online ticketing and box office system serving high-traffic events.*

- Managed 30+ initiatives annually (\$100K–\$1M), driving 30% YoY expansion in events and partnerships.
- Streamlined cloud-based workflows for 100+ users, strengthening reliability and accelerating turnaround.

## EDUCATION

Flatiron School | Certificate, Full-Stack Software Engineering (Ruby on Rails & JavaScript) | Seattle, WA

College of Management | B.A., Media Studies & Management | Rishon LeZion, Israel
